

Media kit 2023

01. Logo

01. Logo

The logo is our brand's most important element. It is a unique and recognizable signifier that shouldn't be reproduced without using an original source file.

The logo consists of two parts:

1. The icon
2. The wordmark

The separate elements should not be altered in any way and should be visible together as much as possible.

The icon can only be used by itself if the wordmark (or at least the brand name) is somewhere in close proximity.
