 Location: Utrecht, NL

 Experience: Junior-senior level

 Contact: langeweg@satelligence.com

 Salary: 48-66K / 40h

 Closing date: 8 October 2024

Meet **Satelligence**

25+

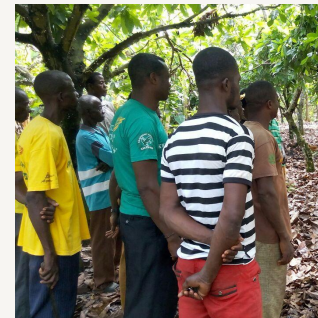

years of
experience

60+

clients
& partners

Satelligence is the market leader in remote sensing technology for sustainable sourcing with the mission to halt deforestation. We provide traders, manufacturers and agribusinesses such as Mondelez, Bunge, Cargill, Unilever, Rabobank with critical sustainability insights empowering them to minimize their global environmental footprint and track their progress against climate objectives, ensuring a sustainable supply chain.

We were founded in 2016 and currently employ +40 people, working in Utrecht and several locations in Asia, Africa, and South America.

About the job

As Full Stack Developer at Satelligence, you will work in a small team with three other full-stack developers and work closely in a product team with designers and product managers. We run a tight ship with 2-week sprints, a well organized codebase and peer reviews. The codebase is written in Typescript using Svelte on Google Firebase and Mapbox. This role will report into the Head of Product.

What will you do?

You will work on our Sustainable Sourcing Platform for large corporations to become deforestation free, carbon positive and compliant with sustainability regulation. You provide feedback on product prototypes, actively participate in sprint plannings and code reviews, layout implementation plans with the other developers in the team and implement the code changes in the codebase.

About you

We are looking for either a Developer with experience in growing codebases in a tight knit team or a Junior Developer with coding skills.

- ✓ You are familiar with Typescript
- ✓ You are familiar with modern JS frameworks (Svelte or others)
- ✓ You have experience and enjoy working in a team with a sprint cycle or similar
- ✓ You prefer a well organized codebase over getting your pull requests merged fast

Nice to have

- ✓ You have experience with serverless technologies (AWS, Firebase, GCP or other)
- ✓ You worked with PostGIS before or bring other experience with geospatial data

What we offer you

- 📍 Office centrally located in Utrecht city centre, close to central station
- ☂️ 27 holidays (based on full-time employment)
- 👐 Pension scheme
- 🍱 Daily lunch at the office
- 🏠 Hybrid working options

Ready for the challenge? Then we would love to hear from you! Email Githa at langeweg@satelligence.com. Enclose your portfolio, and share why you'd be the perfect fit for this position.

If you don't tick all the boxes, don't worry. Apply anyway, and we will review your application!
