

# We are hiring a GIS Specialist

# GIS Specialist

We are looking for a talented GIS specialist with a passion for sustainability to join our Operations team.

 Employment type: 32-40h / week

 Location: Utrecht, NL

 Experience: Medior level

 Contact: [langeweg@satelligence.com](mailto:langeweg@satelligence.com)

 Salary: 48-52K / 40h (including holiday allowance)

 Closing date: 31 December 2024

# Meet **Satelligence**

Satelligence is a satellite-powered geo-data analytics company delivering real-time insights into global agricultural production and supply chain risks, including deforestation and carbon. We empower leading companies like Mondelez, Unilever, Bunge, Cargill, and Rabobank to measure and mitigate risks, make informed sourcing and investment decisions, and track progress.

In 2024, EUSPA recognised Satelligence with the "Best Product" award for its innovative digital solution supporting EUDR compliance. By providing unparalleled supply chain insights, we help businesses drive profitability while fostering a, climate-positive future. With offices in Utrecht, Jakarta, Abidjan, and São Paulo, we're committed to protecting businesses, people, and the planet.

# About the job

As a GIS Specialist, you'll join a diverse, global team in the Operations department, helping corporations achieve deforestation-free, carbon-positive, and regulation-compliant supply chains. Acting as a key technical link between the company and clients, you'll manage geodata, translate customer needs into actionable tasks, and work with our Sustainable Sourcing Platform to support sustainability goals.

Your responsibilities include onboarding clients, managing datasets, and delivering tailored analyses, such as deforestation summaries, risk assessments, and carbon products. You'll also provide technical support to customer-facing teams, ensuring a seamless user experience while contributing to the development of tools that drive sustainability.

# Key responsibilities

- Work for a wide range of clients from all over the world to help them towards 100% deforestation-free sourcing
- Perform data analyses on deforestation, emissions or traceability and create visualizations to alert our clients of current or future risks
- Tightly collaborate in a small team of other GIS specialists scattered across the globe
- Communicate technical information and train users to understand results from our analysis and use them to their full potential
- Perform quality assessments of our internal datasets, new features of our platform and updates to our system backend
- Maintain short lines of communication with our commercial colleagues, our engineers and our developers to improve our existing processes and products to make both our and our customers' lives easier

# About you

- ✓ Based in The Netherlands, with the ability to visit Utrecht on a regular basis
- ✓ 4+ years of working experience in (geospatial) data analysis
- ✓ Ability to thrive in fast-paced environments, managing multiple projects and meeting deadlines
- ✓ Client-oriented with a focus on finding pragmatic solutions for complex problems
- ✓ Enthusiastic collaborator with self-motivation to work autonomously
- ✓ Expertise with GIS software (QGIS, ArcGIS, GDAL, Rasterio/Geopandas)
- ✓ Able to work on a basic level with Git to organize code and data
- ✓ Nice to have: an understanding of forest risk commodities (*cocoa, oil palm, coffee, soy, etc*)
- ✓ Nice to have: some Python experience and setting up your own data pipelines
- ✓ Nice to have: speaking French, Portuguese, Spanish or Bahasa for communication with clients

# What we offer

- 📍 Office centrally located in Utrecht city centre, close to central station
- ☂️ 27 holidays
- 👐 Pension scheme
- 🍔 Daily lunch at the office
- 🏠 Hybrid working options

Ready for the challenge? Then we would love to hear from you! Email Githa at [langeweg@satelligence.com](mailto:langeweg@satelligence.com) and share why you'd be the perfect fit for this position. Even if you don't tick all the boxes, don't worry. Apply anyway, and we will review your application!
