01. About

01. About

At Satelligence, we believe a thriving planet and profitable business go hand in hand.

We empower global commodity supply chains to lead the charge in sustainability – transforming risk into resilience and compliance into competitive advantage.

Our AI-powered, EY-audited platform provides real-time, third-party verified insights into deforestation, carbon emissions and removals, biodiversity, and land-use change. We don't just help companies meet evolving regulations like EUDR and Scope 3 – we enable them to drive measurable climate impact and set new industry benchmarks.

With a proven track record across over 70% of the global palm oil and cocoa sectors and partnerships with the world's top five food companies, **Satelligence moves clients from reactive compliance to proactive, future-proof operations.**

Our end-to-end solutions and integrated partnerships guide businesses through their sustainability journey – from hyper-local insights to global-scale transformation. Satelligence customers aren't just meeting standards; they're redefining them.

With offices in Utrecht, Jakarta, Abidjan, and São Paulo, we are united by a single purpose: to protect businesses, people, and the planet – together building a more sustainable future.

02. Logo

02. Logo

The logo is our brand's most important element. It is a unique and recognizable signifier that shouldn't be reproduced without using an original source file.

The logo consists of two parts:

1. The icon
2. The wordmark

The separate elements should not be altered in any way and should be visible together as much as possible.

The icon can only be used by itself if the wordmark (or at least the brand name) is somewhere in close proximity.
